Twenty years' practical experience in farming, and seven years experience in the manufacture of plows, has enabled the patentee to offer to dealers and to the farming community a series of plows for general purposes which he thinks are unequalled. The leading characteristics to which he would call a tention are as follows: First-Great strength and durability. Second-Very light draft. Third—Simplicity of construction and ease of repair.

Fourth—Adaptation to every kind of soil—can use either steel or cast points; cleans itself under all circumstances, shedding even the stickiest and most putty like soil, with ease.
